PACE

Personality Awareness, Characteristics & Expression

Paired Comparison Scorecard

Person A Name: _____ Gender: _____ Age: _____

Person B Name: _____ Gender: _____ Age: _____

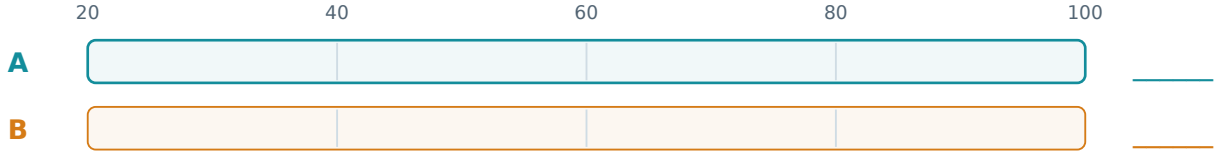

Complete the PACE questionnaire separately, then transfer each person's five scores.

Shade each bar from 20 to the score, or mark the score with a vertical line.

Blank tracks below are for your results; they do not show example scores.

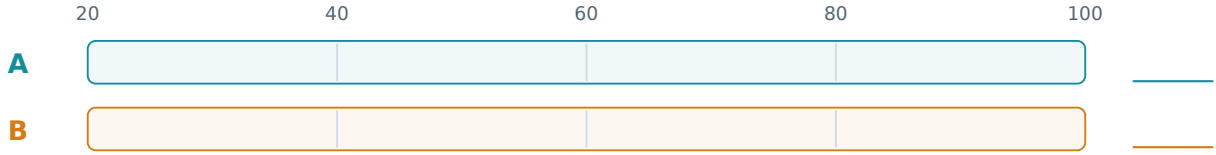

Extraversion

Score

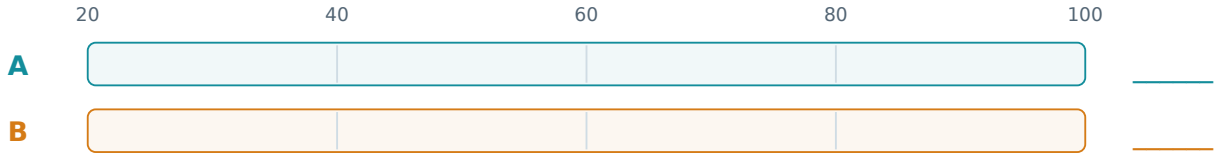

Type A

Score

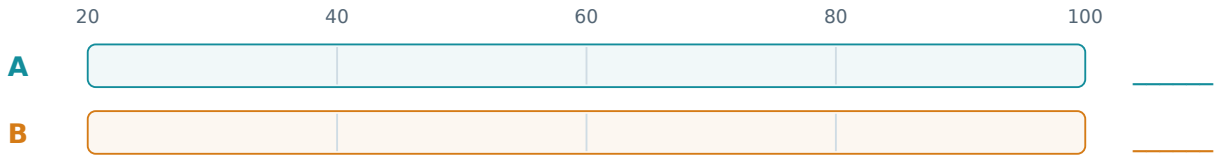

Confidence

Score

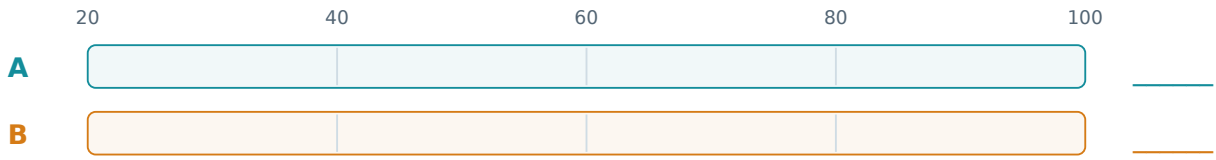

Adaptability

Score

Perfectionism

Score

Scoring: group total × 5. Four responses rated 1-5 give a score of 20-100.

Higher scores mean greater endorsement of the named characteristic, not a better result.

Discuss differences in context. Similar scores do not establish compatibility.

Informal reflection tool | Not a validated test or compatibility predictor
